Craft Beer

## EXPERIENCE

### Associate Solutions Developer – Acxiom

2021-Present

- Refactored a REST Api to Spring Boot and updated with current team standards
- Lead a monthly program release
  - Aided with builds when needed and resolved issues
  - Tracked and communicated progress of other developers on new features, bugs, and tasks to management
- Developed a financial services application used by the client, a Top Fortune 500 company, with a team of developers, communicating with cross-functional teams on requirements and design

### Associate Tester – Acxiom

2019–2021

- Maintain and develop test data mockers using Python and Perl used by the Settlement/Batch team to improve end-to-end testing
- Spearheaded an effort to move the test data mockers onto a version control system to aid in synchronizing & reducing siloing (git)
- Test Lead over three technical projects which involved an in-depth analysis of the design for a clearer grasp of the program and to direct teammates
- Write test cases and oversee testing for projects involving APIs, database calls, and batch file processing

### Intern Tester – Acxiom

2019

- Tested programs for an Optimization Project on a Top Fortune 500 company to enhance workability and efficiency
- Trained in Settlement and Batch testing and gained an understanding of the SQL and code used

### Capstone - UALR, Arkansas

2019

- Group developed a WYSIWYG website editor web application for professors with nominal technical experience using JavaScript, PHP, and MySQL.

## EDUCATION

### University of Arkansas at Little Rock

Bachelor of Science in Computer Science

May 2020

Major GPA 4.0
